Objective: Passionate and Experienced Computer Science student with over six years of programming experience across Python, HTML, CSS, JavaScript, C++, and Lua, seeking a Software Development Internship. I plan to leverage my skills in development, team-based experiences and problem solving to contribute to projects and gain valuable industry experience.

Education:

Wayne State University Bachelor of Science in Computer Science 3.4 GPA Expected Graduation: 2027

Relevant Coursework:

- Software Engineering,
- Engineering,
- Game Development,
- Communications,
- Technical Communications II,

Soft Skills:

- Communication skills during meetings and peer review
- Time Organized
- Flexible to last-minute changes.

Technical Skills:

- Programming Languages: Python, HTML, CSS, JavaScript, C++, Lua
- Software Development: Game Development, Multiple code editor experience,
- Debugging and Troubleshooting
- Tools & Technologies: PyCharm, Visual Studio, Git, Visual Studio Code, Roblox Studio

Experience:

1. Founder, Lead Programmer: AEGIS, Video Game 2022 – Present

- Spearheaded the development of several video games, dedicating over 8 hours daily to coding, debugging, and feature implementation.
- Led a team of programmers in problem-solving and feature creation, ensuring high-quality deliverables.
- Utilized Lua extensively to develop game features and mechanics in Roblox Studio.

2. Backend Web Development: Wilson Adaptive Technologies 2024-2024

- Optimized backend for wilsonadaptive.com.
- Led and worked with my team to conduct analysis, make changes, and generate reports.
- Utilized HTML, JavaScript, and CSS.

Professional Development Goal:

- Achieve proficiency in C++ by December 31, 2024, through advanced projects, coding challenges, and assessments.
- Goal: Improve time management skills within 6 months using digital calendar apps and setting daily reminders.
